ABOUT ME

Keo is a full-stack developer with 5+ years experience working on both complex front-end websites and back-end web applications. He can build web pages pixel-by-pixel from design provided in Adobe XD, Figma, Photoshop, ...etc format using HTML5/CSS3/JS/ES6/Babel/Grunt/Gulp/Less/SASS/ReactJS/Cypress. He has solid understanding of Accessibility Compliance, Responsive Design and SEO Optimization. For back-end Keo uses PHP/PDO/SQL/NodeJS to design database, setup and integrate API endpoints, set up CMS such as SilverStripe, set up OAuth2 authentication system from scratch, perform security audit and use Docker and Docker Compose to containerize application. Keo also has experience working with Shopify Liquid to develop Custom Shopify themes and is familiar with JIRA, bitbucket, GIT. Keo enjoys doing the little things to optimize performance and quality of his code.
